MESSAGE

It is a pleasure to learn about the 18th edition of Organic + Biotech India World Expo, co-located with Agro + F&B Pro Expo being organised by the Trinity group from December 3-5, 2020.

A key to rural development, agriculture sector has been given utmost importance in the last few years. Comprehensive and integrated measures have been boosting productivity and self-reliance in the sector. Our constant emphasis has been on strengthening a robust infrastructure in agriculture sector and allied industries such as horticulture, food processing, animal husbandry and dairying, aimed at bringing a qualitative change in the lives of our hardworking farmers.

Addition of new dimensions to agriculture and its related activities has opened new vistas of opportunities for our farmers. Latest reforms have given farmers access to more options for big market and higher prices, ensured their easy access to futuristic technology and provided them new legal protection, while existing systems have also been strengthened.

With huge demand for India's agricultural products all over the world and major reforms underway in the country, our agro experts, agro economists and other valued stakeholders have a significant role to play to design the new contours of sectoral transformation for a self-reliant India.

The 18th edition of Organic + Biotech India World Expo and Agro + F&B Pro Expo will provide a platform to the experts from the sector to deliberate upon the latest advancements in the field of agriculture. The participation of policy makers, professionals and various key partners will help chart out a roadmap for future needs of the sector for larger benefit.

I am sure that the focus of the Expo on organic, agriculture and horticulture, food processing industries, fisheries, food and beverages and other allied industries will further strengthen and revitalise various agro-based industries and businesses. May the shared experiences at the Expo inspire various stakeholders to help the sector achieve higher levels of excellence.

Best wishes for all success of the Expo.

It gives me immense pleasure to know that the 18th Edition of Organic + Biotech India World Expo co-located with Agro+F&B Pro World Expo & Conference is being organised by Trinity Group at Goa from 14th to 16st June 2020 and at Mumbai from 3rd to 5th December, 2020.

As the event seeks to provide a platform for international exposure and promotion of new technological innovations in agriculture and allied sectors apart from addressing some critical issues of agriculture, horticulture and organic sectors; it is imperative for all stakeholders to build a bridge between the farmers, domestic and international buyers, government agencies, industries and academics through this initiative.

I hope that the 18th Edition of Organic + Biotech India World Expo opens up newer dimensions in bringing science and innovation to the help of the farmers. I extend my best wishes to the organisers for this endeavour.
